SIR::

INTERNATIONAL STAGE EXPRESS MAIL CERTIFICATE

"Express Mail" label number EV011019161US

Date of Deposit November 15, 2001

I hereby certify that the following attached paper(s) or fee(s)

is/are being deposited with the United States Postal Service "Express Mail Post Office to Addressee" service under 37 CFR 1.10 on the date indicated above and is/are addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Barbara D. Santiagp

Typed or printed name of person mailing paper or fee)

Barbara D. Santiagp  
(Signature of person mailing paper or fee)

Each paper letter or communication relating to an international application during the international stage for which a date of filing is to be obtained as of the date of mailing must have its own certificate and the "Express Mail" label number as a part thereof or attached thereto. When, as here, the certification is presented on a separate sheet, that sheet must (1) be signed and (2) fully identify and be securely attached to the paper or fee it accompanies. Identification should include the serial number and filing date of the application as well as the type of paper being filed, e.g. complete application, specification and drawings, responses to rejection or refusal, notice of appeal, etc. If the serial number of the application is not known, the identification should include at least the name of the inventor(s) and the title of the invention.

The label number need not be placed on each page. It should, however, be placed on the first page of each separate document, such as, a new application, amendment, assignment, and transmittal letter or a fee, along with the certificate of mailing by "Express Mail". Although the label number may be on checks, such a practice is not required. In order not to deface formal drawings it is suggested that the label number be placed on the back of each formal drawing or the drawings be accompanied by a set of informal drawings on which the label number is placed.

SECOND PRELIMINARY AMENDMENT

Please amend claim 13 as follows:

C

13. (amended) A weighing machine for weighing offbatches of material, said weighing machine comprising a frame portion on which a central distributor, a plurality of transporters and a plurality of scales are mounted, and wherein the transporters are arranged around the central distributor and configured with a view to transporting material from the distributor and radially outwards from the central distributor and to the scales characterized in that the weighing machine comprises one or more substantially uninterrupted shields in the form of screen faces that extend upwards and downwards underneath the transporters in the operative position of the machine.

Respectfully submitted,
